

Dear Hiring Team at Caplena,

I am writing to express my strong interest in the technical customer success role at Caplena. With my background as a Senior Software Engineer at EPAM Systems and my ongoing focus on machine learning and complex data workflows, I am drawn to this opportunity to act as the central bridge between your customers, Product, and Customer Success teams. I thrive in roles where I can leverage my technical depth to directly impact customer activation and long-term product success.

Throughout my career, I have developed a robust technical foundation that aligns directly with your must-have requirements. I have extensive experience building, structuring, and maintaining complex data pipelines, utilizing Python and SQL for heavy data manipulation, transformation, and validation. Recently, my work has heavily involved preparing and cleaning data sets for machine learning models and orchestrating local AI solutions, which requires a deep understanding of data quality checks and API integrations.

Beyond the technical execution, I deeply value the human element of software. Working in a senior engineering capacity at a global consultancy has honed my ability to translate complex backend configurations and integration errors into actionable, understandable steps for stakeholders and clients. I enjoy troubleshooting the intricate data configuration issues that prevent users from going live and collaborating directly with Product teams to eliminate those friction points. I approach these interactions with a patient, empathetic mindset, understanding that a seamless technical onboarding experience is the foundation of customer retention.

Being based locally in Zurich, I am well-positioned to integrate with your team. I am eager to bring my technical curiosity and background in backend workflow optimization to Caplena to help scale your customer operations efficiently.

Thank you for considering my application. I would welcome the opportunity to discuss how my technical expertise and passion for problem-solving can help ensure Caplena's customers are consistently successful.

Sincerely,

Spas
